

1. The first step is to identify the problem or question that needs to be answered.

2. Next, gather relevant information and data to understand the problem better.

3. Then, analyze the information and data to identify patterns and trends.

4. After that, develop a plan or strategy to address the problem or question.

5. Finally, implement the plan and evaluate the results to see if the problem has been solved.

6. If the results are not satisfactory, go back to step 2 and gather more information.
